

# KEIR

# Abrasives and Sharpening Stones

Made From Purest Synthesized Grains

Sharp Definition

High Quality Consistent Grading

Custom Printed Stones

Any Size and Shape

On-Time Shipments

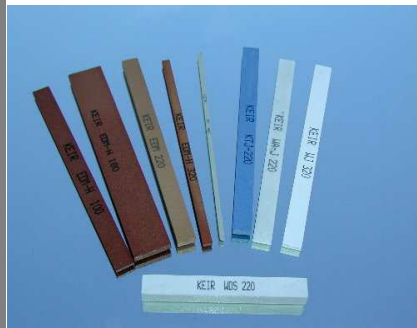

Made in The U.S.A.

Materials:

White Aluminum Oxide  
Brown Aluminum Oxide  
Green Silicon Carbide  
Black Silicon Carbide

KEIR's abrasive products are made from the purest synthesized grains. Each grit has been selected and classified for its uniformity of particle size.

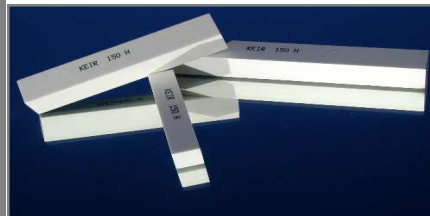

We carefully mold and form each piece to ensure sharp definition and consistent grading. All production is lab-tested and graded to meet each product specification. Grits ranging from 60 to 1200.

Mold Polishing Stones for Tool & Die work

Jointer Stones for Woodworking Tools
