

Air Wipes

Composite Flyer Bows

Guides/Eyelets/ Bushings

Welding Sleeves

Brick Core Tips

Furnace Components

Sand Blasting Nozzles

Abrasive/Sharpening Stones

- Efficient Patented Design
- Durable Replaceable Ceramic Inserts
- Minimum CFM Air Consumption

- 99.8% High Purity, Long Lasting Materials
- Standard and Custom Parts
- Prototypes and High Volume Runs

- Strong Lightweight Composites
- Higher Operating Speeds and Less Downtime
- Improved Wire Quality

- Purest Synthesized Grains for Sharpest Finish
- Mold Polishing Stones, Dressing Sticks, and Knife Sharpeners
- Wide range of Size and Grading

Productive Solutions
KEIR Manufacturing, Inc.

About Us

KEIR Manufacturing, Inc. is a North Carolina, USA based company that manufactures and markets a large variety of technical ceramic and engineered products serving a diverse group of industries. For the Wire and Cable industry worldwide, KEIR's products include a wide range of high purity Ceramic Guides and the Frontiersman line of Air Wipes along with state of the art Composite Flyer Bows and Ceramic Pulleys from the recently acquired Wire Products business unit of Kamatics. KEIR also produces engineered ceramic products for the textile, brick and sandblasting industries as well as high-temperature furnace components and a large number of other specialty applications. We established an abrasives division in 2001 to manufacture superior quality sharpening, dressing, and polishing stones.

Since its inception in 1983, KEIR has developed proprietary forming and machining methods that allow us to produce an incredible assortment of parts efficiently and quickly, usually without expensive tooling. We have an entrepreneurial culture that seeks to challenge assumptions.

During 2009 KEIR served 485 customers in eighteen countries, producing 2,130 orders for them. Doing business with us is easy and satisfying. Our customers come back.

Our Mission

KEIR's mission is to engineer value for our customer. We dedicate ourselves to making products that enable industry to run more efficiently and productively through the application of advanced materials. We differentiate ourselves by offering not just products, but a partnership with each customer to create solutions of real value to meet their specific needs. Our creative team quickly responds to any opportunity with immediate turn around and personal service.

Our Performance

We know what we are capable of and we do it every day.

- Reliable on-time production you can count on.
- Our quoted lead-times are commonly half as long as industry standard.
- Tolerances on technical ceramics are held 50% tighter than industry standards.
- Our prices are competitive worldwide.

What to Expect from KEIR

We like what we do and our pride is evident in how we do it.

- When you contact KEIR you can expect friendly, knowledgeable, personal service.
- You can expect a quick response to your quotation request, usually within a few hours.
- All orders are acknowledged with the scheduled ship date.
- Production of your order will begin within twenty-four hours of our receipt of your order.
- All materials, batches, labor and methods will be tracked as your order is produced inspected and shipped.
- We will carry inventory on parts you purchase routinely.
